PROJECTS

E-commerce Website | HTML, CSS, JavaScript

- Developed a dynamic web application showcasing makeup products. Integrated features for displaying product name, price, and rating, along with a secure payment option.

MCA Record Maintenance | HTML, CSS, JavaScript, Node.js, MongoDB

- Developed a comprehensive web platform for maintaining MCA student records. Enabled users, including students and faculty, to efficiently search for student information by name, roll number, and skills.

Spotify Clone | HTML, CSS, JavaScript, React

- Developed a Spotify clone webpage with a sidebar for search, playlist management, and podcast browsing. Main content area features recently played songs, favorite artists, and top India songs. Integrated music player includes play/pause, volume control, and navigation buttons.

Simon Says Game | HTML, CSS, JavaScript

- I developed a game called "Simon Says." In this game, a random color flashes on the screen, and the user must press the corresponding color key. If the user presses the correct key, the game advances to the next level. In each new level, an additional random color flashes on the screen, and the user must repeat the entire sequence of colors, including the new one. If the user makes a mistake, the game is over. The final score is displayed, and the user has the option to restart the game.
